

Group Meeting Comments for 蘇庭玉

Kuei-Yuan Chan*

September 23, 2013

1 General comments for this research

- (a) 目前的報告內容仍十分缺乏研究動機及目的，且所有主題圍繞著停車系統，但妳的論文要展現的是更多研究的深度，請不要把論文變成專利說明書。我的建議是重新製作新的投影片，不要被現存的投影片所侷限，仔細想想以下問題：

How to reduce/prevent human uncertainty in a goal to achieve higher product reliability ?

- (b) 請問你一整個暑假的文獻探討內容為何？這一部分是堆疊出妳的研究主旨的重要方針，沒有完整的文獻，所有的研究只變成單純的‘我想要這樣做’，或是‘別人要我這樣做’。請不要把現(既)有的東西硬塞進一個想像的題目而完成一份報告，想想研究單位工讀生與研究員的差別。
- (c) Think about how to transit from parking problem to general human-machine reliability problem.

2 General comments about this presentation

- (a) Can the mouse move with the presentation in the final file?
- (b) Can we forward/backward at any place of the slide when we listen to your talk? Can we fast forward ?
- (c) 報告的動畫過多，導致很多資訊在播放該張後便消失。
- (d) 若自行變換投影片，則與口白不同步，如何處理？
- (e) Too much talking without visual aids.

3 Specific comments about this presentation

- (a) ARX model needs some example. The way you presented only finished your task, not intended for people to understand.
